Bouche d'arrosage à clef à la charge du lot VRD.
Le réseau PEHD depuis le collecteur de départ situé en traitement d'eau et sortie extérieur sur vanne à la charge du lot CVC

Bouche d'arrosage à clef à la charge du lot VRD.
Le réseau PEHD depuis le collecteur de départ situé en traitement d'eau et sortie extérieur sur vanne à la charge du lot CVC

La pénétration de l'AEP en VS est à la charge du lot CVC.
Le lot VRD devra la fourniture et la mise en place d'une chambre de tirage LLT et l'installation d'une vanne papillon sur le réseau en attente.

Hypothèses Générales Eau Potable
