

[illegible]

Diagram illustrating the cross-section of a wall foundation with insulation and drainage details:

- Dallage BA ép. 15cm**: Concrete slab, 15 cm thick.
- +889,20 BF N.G.F. (finition Quartz)**: Level of the finished ground surface (Niveau de Fini) with a quartz finish.
- Isolant en sous face ép. 10cm**: Insulation on the underside of the slab, 10 cm thick.
- Voile BA ép. 20cm**: Concrete wall, 20 cm thick.
- (Suivant le cas, voile enterré ou voile façade courant)**: Depending on the case, the wall can be an exterior wall or an interior wall.
- Drain P.C.C.**: Drainage channel made of concrete.

The drawing is a vertical cross-section of a lift shaft. At the top, a horizontal line indicates the floor level with a height of +869.20 NGF Fini. Below this, a section of the shaft wall is shown with insulation (isolant en 50) and a concrete base (sous-face ép. 10cm). The shaft wall is labeled 'Joint de Dilatation 2cm'. The shaft opening is 330 units wide. The shaft floor is labeled 'Voile BA ép. 20cm'. The shaft walls are labeled 'Gaine ascenseur'. The shaft floor is labeled 'Seuil, suivant détail ascensoriste'. The shaft walls are labeled 'Linéau BA'. The shaft floor is labeled 'Dalle BA ép. 15cm'. The shaft walls are labeled 'Contre-dalle ép. 20cm'. The shaft floor is labeled 'Dalle BA ép. 40cm'. The shaft walls are labeled 'Fosse ascenseur + cuvelage'. The shaft floor is labeled '110/fini' and '130/niv. fini'. The shaft walls are labeled '330' and '370'. The shaft floor is labeled '350 (A confirmer en EXE/plan ascenseur)'. The shaft walls are labeled 'Joint de Dilatation 2cm' and 'Poutre BA 20x20ht'. The shaft floor is labeled '+862.70 NGF Fini' and '+862.68 NGF Brut'. The shaft walls are labeled '20' and '20'.
