

TENDER RULES

Tender reference:
2025ALOI-PROTONS_ACCELERATOR-CT

SCOPE OF WORK

SUPPLY OF A 3 MEV PROTON ACCELERATOR AND AN ASSOCIATED BEAMLINE

DEADLINE FOR APPLICATIONS **(STEP 1)**

27th of August 2025, 15:00 (GMT+01 :00)

DEADLINE FOR SUBMISSION OF OFFERS ONLY FOR **CANDIDATES INVITED BY ONERA** **(STEP 2)**

4th quarter 2025

This date will be confirmed or amended in the invitation to submit an offer sent to selected candidates only.

PREAMBLE

The Consultation File (CF) is composed of the following elements:

N°	Intitulé
TR	<p>The Tender Rules (TR - ref. TR-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) and its 2 appendices:</p> <ul style="list-style-type: none"> the supplier information sheet (A1_TR-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) the applicant's references (A2-TR-2025ALOI-HERMES_PROTONS ACCELERATOR-CT)
DC	<p>the Draft Contract (DC - ref. DC-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) and its 4 appendices:</p> <ul style="list-style-type: none"> the certificate relating to the prevention of concealed or illegal work (ref. A1_DC-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) <i>the Decomposition of the Global and Fixed Price (DGFP - ref. A2_DC-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) (*)</i> the Contractual clauses protecting French national defense secrets (ref. A3_DC-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) the Non-Disclosure Agreement (NDA - ref. NDA-2025ALOI-HERMES_PROTONS ACCELERATOR-CT)
CCAG-MI	An English version of the General Administrative Clauses applicable to industrial public contracts (CCAG-MI) in the version approved by the order of 30 March 2021 (ref. CCAG-MI_EN-for information only) ¹
STS	the Summarized Technical Specifications (STS - ref. STS-2025ALOI-HERMES_PROTONS ACCELERATOR-CT)
TS	<i>the complete and detailed Technical Specifications (TS - ref. HERMESphase1-STB-2025-1.1from 11/04/2025) (*)</i>
RM	<i>the Requirements Matrix (RM - ref. MATRIX-2025ALOI-HERMES_PROTONS ACCELERATOR-CT) (*)</i>

These documents are the property of ONERA. The information thus communicated shall not be used for any purpose other than the preparation of a response to the present consultation.

The CF can be downloaded from the French State Procurement Platform ("PLACE") <https://www.marches-publics.gouv.fr> on ONERA's buyer profile under the reference: 2025ALOI-PROTONS_ACCELERATOR-CT.

¹ The document is attached to the consultation as information only. In case of interpretation or contradiction, only the French version shall prevail.

(*) The above-mentioned DGFP (appendix 2 of the Draft Contact – DC), complete Technical Specifications (TS), and requirements matrix (RM) are not available on the PLACE website, in order to protect the confidentiality of the information they contain. Only a brief technical description of ONERA's need (STS) is made available to candidates for this step 1.

The complete technical specifications and the two other documents will be sent only to the candidates invited to submit their offers in step 2, after signature of the confidentiality agreement (NDA) (appendix 4 of the Draft Contact – DC).

Notes on downloading via PLACE:

1/ It is recommended that applicants register and login when downloading from PLACE; otherwise they will not be able to receive any messages relating to the procedure, exclusively sent by the "PLACE" website (e.g. modifications to the consultation files, answers to questions, etc.).

2/ E-mails sent by the "PLACE" platform are sent from the e-mail address nepasrepondre@marches-publics.gouv.fr. It is the responsibility of the applicant to ensure that emails sent from the PLACE are not filtered.

1 PURPOSE – DESCRIPTION OF THE SERVICE AND STRUCTURE

1.1 Purpose

This tender rules document defines the detailed rules of the procedure prior to the award of a contract for **the supply of a 3 MeV proton accelerator and an associated beamline in the framework of the HERMES project for the benefit of the ONERA center in Toulouse**, meeting the specific requirements set out in the documents for this consultation.

1.2 Funding

This service will be funded by ONERA's own funds, completed by funding from the European Regional Development Fund (FEDER) for the Occitanie region, and by the National fund for regional planning and development (FNADT).

1.3 Structure

The Contract is a contract with parts.

The Contract consists of a firm part and three optional parts, as follow:

Part	Purpose
Firm part	Supply of a 3 MeV proton accelerator and an associated beamline, including the overall analysis of scientific equipment and their building interfaces.
Optional part 1	Additional supply of an instrumentation cabinet
Optional part 2	Supply of tooling, equipment, and spare parts
Optional part 3	On-factory storage of the material

The firm part is enforceable upon the notification of the Contract.

The optional parts will be executed, if applicable, by service orders notified by ONERA.

1.4 Contract security

The Contract corresponds to a contract qualified by ONERA as a "standard contract in a ZRR (*Zone à Régime Restrictif – Restricted Area*)" with access control (MZ).

1.5 Completion date

The completion date for the services may not exceed 30/11/2028.

2 TYPE AND CONDUCT OF THE PROCEDURE

2.1 Procedure

In accordance with the provisions of articles L.2124-1 and R.2124-1 of the French Public Procurement Code (FPPC), in view of the nature of the services and the amount at stake, the consultation is carried out according to a **formalized procedure**.

The procedure set up by ONERA is a “**procedure with negotiation**” (articles L.2124-3, R.2124-3 and R.2161-12 to 20 of the FPPC).

Indeed, the future contract includes design services.

The procedure for negotiation is defined in article 4.2-c below.

However, ONERA reserves the possibility of awarding the contract on the basis of the initial offers received without negotiation.

As this is a restricted procedure, the consultation is carried out in two separate steps:

- a first step for the submission and selection of applications, **ONGOING STEP**,
- a second step for the submission of offers only by the candidates invited to submit an offer by ONERA at the end of step 1

2.2 Allotment

The contract consists of a single package. The nature of the services requires a coherent package.

2.3 Variants and possible additional services

Definitions	
Variant	Alternative offer
Possible additional services (PAS)	<p>Addition of an extra functionality not necessary for the proper performance of the services and not modifying the basic offer.</p> <p>This can be seen as an option that can be confirmed or not by ONERA. In the event that the functionality is not confirmed, this shall not in any way compromise the basic offer.</p>

a. Variants

"Free" variants, at the initiative of the applicant, are allowed. The applicant shall propose only 2 free variants, including the possible variant mentioned by the TS and identified by **AS.ACCEL-1** (SF6 or alternative gas as insulating gas).

Response to the basic offer is mandatory.

Variants must be clearly identified in the tender documents. A separate offer must be submitted **for each variant**.

b. Possible Additional Services (PAS)

The firm part of the Contract includes the following possible additional services (PAS):

ONERA Direction des Achats
29 Avenue de la Division Leclerc – CS 90027
92322 CHATILLON Cedex

OFR-ACCEL-1	Supply of the item [BCM 1.1].
OFR-ACCEL-2	Supply of the item [BCM 2.1]
OFR-ACCEL-3	Supply of a first beam position measurement item, [BPM 1.1] (Beam Position Monitor), to determine the beam's centering and optimize its quality.
OFR-ACCEL-4	Supply of a second beam measurement item, [BPM 2.1], to determine the beam's centering and optimize its quality.
OFR-ACCEL-5	Additional Software features
OFR-ACCEL-6	Pre-arranged position of the windows, as sub-functions, on the screens
OFR-ACCEL-7	Availability of a non-perturbative, continuous measurement of the ion beam current from the primary line (via Beam Current Monitor (BCM) or other equipment).

The costing of all the PAS is **optional**.

Thus, they are not taken into account during the analysis of the offers (see § 4 below).

ONERA decides to confirm these PAS only after awarding the contract to the supplier.

2.4 Visit (optional)

In order to better assess the scope of the services to be provided and the conditions under which they will be carried out, applicants may visit the ONERA center in Toulouse before submitting their bids (step 2, only for applicants invited to bid by ONERA after step 1).

Visit dates will be specified in the invitation to tender for step 2 and should be either in **September or October 2025**.

Visit is made after initial contact by mail with the ONERA representative (contact details will be specified in the invitation to tender for step 2, only for applicants invited to bid by ONERA).

This e-mail must specify the company and the surnames, first names and nationalities of the persons who will be present during the visit; it must be accompanied by a scan of the associated valid identity documents (note: a driving license alone is not sufficient proof of identity).

Access to the ONERA center in Toulouse requires presentation of the original identity document (used for the scan). Applicants are informed that the checks inherent in authorization to enter ONERA centers may require an indefinite period of time, particularly for non-European Union nationals.

2.5 Exchanges

Throughout the consultation period, the candidates can exchange and ask questions to ONERA about the project and the procedure. **All exchanges shall exclusively take place via the PLACE dematerialization portal on ONERA's buyer profile** and all requests shall be received no later than seven (7) working days before the deadline for submission of applications or offers. ONERA undertakes to provide an answer to all questions. No question arriving after the deadline will be handled. No oral questions shall be answered, in order to preserve the equal treatment of candidates and the transparency of the procedure.

All questions and the associated answers will be forwarded to all registered applicants, subject

ONERA Direction des Achats
29 Avenue de la Division Leclerc – CS 90027
92322 CHATILLON Cedex

to their general scope and with due respect for the confidentiality of the information provided by each applicant.

⚠ No information can be provided by ONERA between 08.08.2025 and 18.08.2025 included.

2.6 Modifications to the CF

ONERA reserves the right to make minor modifications to the CF, at the latest five (5) working days before the deadline set for the submission of applications or offers. Applicants shall then submit an application/offer on the basis of the modified CF, without being able to make any complaint in this respect.

If, during the examination of the CF by the candidates, the deadline set for the submission of applications is extended, the previous provision shall apply in accordance with this new date.

2.7 Proposal as a group of companies

In pursuance of article R2142-19 of the FPPC, the applicant has the possibility of making a proposal in a grouping with one or more other companies.

If an applicant chooses to respond in a group with one or more other companies, for questions of liability, the legal form to be taken by the group of companies shall be either the joint grouping or a collective grouping with joint and several liability of the authorized representative.

The same applicant may not submit more than one application by acting both as an individual applicant and as a member of one or more groups or as a member of more than one group.

Throughout this document, “the applicant”, “the company”, “the firm”, “the economic operator”, “the applicant”, “the future contractor”, refers either to the applicant alone or to all the members of the group, where appropriate.

The applicant undertakes to include all the clauses and constraints of this consultation and of the future contract to its possible co-contractors.

The details to be added to the draft contract in the case of a group of companies will be given by ONERA to the relevant applicants, where appropriate.

2.8 Subcontracting

The future contractor has the option of subcontracting the performance of one or more parts of the services requested.

Subcontracting may be declared as soon as the applicant submits its application or subsequently, even after signature of the contract. In any case, any subcontracting shall be declared and subject to prior and explicit acceptance by ONERA², before any start of performance of the subcontracted services.

Total subcontracting is prohibited.

The applicant undertakes to include all the clauses and constraints of the present consultation and of the future contract to its possible subcontractors, validated by ONERA.

² It is essential that this point be anticipated in order to avoid any impact on the schedule for the provision of services.

2.9 Contract for additional supplies

In accordance with article R.2122-4, 1°, of the French Public Procurement Code (FPPC), ONERA reserves the right to award contracts directly to the Contractor for additional supplies intended either for the partial renewal of supplies or the extension of supplies that will be acquired under this contract.

STEP 1 – APPLICATIONS

Current step

3 PRESENTATION AND ANALYSIS OF APPLICATIONS

3.1 Presentation of application

a. General information

If the applicant relies on the professional, technical and financial capacities of other applicants (co-contractor, subcontractor), the applicant shall produce the same documents concerning this economic operator as those required for the applicant itself.

The documents requested in the file shall be written either in French or in English.

However, any document delivered by national competent authorities of the applicant's country may be provided in the official language of the country but the applicant shall then provide a translation of such documents (either in French or in English).

Whichever way the applicant chooses to present its application, its attention is drawn to the importance of sending all the requested documents.

b. Administrative documents: content and form of presentation

The applicant shall provide, pursuant to article R2143-3 of the FPPC, all of the following elements:

No.	Document/ Information	Comments
C1	An application letter, including a sworn statement that the applicant does not fall within any of the cases in which they are prohibited from submitting a tender.	model DC1 is available at the following address http://www.economie.gouv.fr/daj/formulaires-declaration-du-candidat (+ <i>explanatory note</i>)
C2	A declaration of competence	model DC2 is available at the following address http://www.economie.gouv.fr/daj/formulaires-declaration-du-candidat (+ <i>explanatory note</i>)
C3	ONERA supplier information sheet (appendix 1 to this document).	Completed and signed by a person authorized to bind the applicant.
C4	Unique identification number (SIREN no. issued by INSEE) ³ or, failing that, any document proving their company's registration, issued by the competent judicial or administrative authority in the country of	

³From this no., ONERA can access the necessary information concerning the (French) applicant on the site <https://annuaire-entreprises.data.gouv.fr> proof of registration, identification of the Directors etc.

	origin, dating back no more than three months.	
C5	Delegation of powers in the event of signature by a person other than the person(s) identified as the applicant's "Directors". ⁴	
C6	Non-Disclosure Agreement	Completed and signed by a person authorized to bind the company in two original specimens (if handwritten signature) – see article 5.3 here under
C7	Documents relating to human, technical and professional capacity, including certifications held (for example the CAMARI certification for accelerators or equivalent, or any other Quality / Environmental / ... certification), and the presentation of the tasks that the applicant intends to subcontract.	
C8	Presentation of a list of services with characteristics similar to those required by ONERA, provided over the last three years, including for each service a very succinct description, the approximate amount, the year, the recipient (appendix 2 to this document).	

For the present consultation, the applicant is authorized to submit its application using the “DUME” mode (to replace DC1 and DC2, documents C1 and C2 in the list above), directly accessible via the PLACE website.

If appropriate and justified, the applicant can provide any other document proving its economic, financial and technical ability to perform the services (for example, in the case of a newly established company).

In addition, the applicant is exempt from transmitting the application documents requested if they are contained in a free digital storage space (it shall then provide the information necessary to consult this storage space).

3.2 Assessment of the application – Eligibility of candidates to participate in Step 2 of submission of offers

The application is assessed on the basis of the information and documents requested above, taking into account the legal situation of the economic operator as well as its guarantees and capacities, in accordance with the provisions of Articles R.2144-1 to 7 of the FPPC.

ONERA reserves the right to proceed with the regularization of any incomplete application or to request additional information on the documents and supporting evidence produced, within an appropriate time limit (set in the request for additional information).

⁴ONERA shall verify the authority to bind the applicant of the individual(s) by accessing the Officers page of this same site.

Candidates whose files are incomplete, those which are prohibited from submitting tenders or those who have provided inaccurate information will be automatically eliminated, after ONERA has potentially requested that the situation be rectified.

In accordance with Articles R.2144-8 and 9 and R.2142-15 to 18 of the FPPC, the number of candidates invited to submit an offer and therefore to participate in step 2 of the consultation is set at minimum three (3) and maximum five (5).

The objective criteria for assessing the quality of the application, of equal importance, are as follows:

- 1) The experience and the references of the candidate for the last three years**
- 2) Economic and financial capacity (turnover for the last three years and its evolution in particular)**
- 3) The human, technical and professional capacity**

If the number of applicants meeting the minimum capacity requirements is lower than the minimum of applicants set above, ONERA reserves the right to continue the procedure with the only applicant(s) with the required capacity.

Only the candidates selected by ONERA at the end of this step 1 are invited by ONERA to submit an offer and thus to participate in step 2.

STEP 2 – OFFERS

For the applicants invited by ONERA to submit an offer at the end of step 1 only

4 PRESENTATION AND ANALYSIS OF OFFERS

4.1 Presentation of offer

In support of its offer, the applicant shall produce at least the documents listed below:

N°	Document / Information	Signature	Formats
O1	The draft contract (DC) and its completed appendices 1 and 3	x	Word <u>and</u> pdf
O2	The decomposition of the global and fixed price (DGFP - Appendix 2 to the above-mentioned draft contract)	x	Excel <u>and</u> pdf
O3	The requirement matrix (RM)	x	Excel <u>and</u> pdf
O4	A technical offer, which shall include: <ul style="list-style-type: none"> the proposed technical solution and the technical characteristics of the proposed materials/equipment; the justification for this solution (test results, simulation, demonstration, etc.); the compliance with requirements defined in the technical specification (TS); where applicable, any deviations (for non-mandatory requirements); the means and methodology implemented to enable ONERA to assess the clear understanding of the need and the quality of the offer. 		pdf
O5	The overall timeframe for the execution of the service and the detailed schedule		
O6	The environmental provisions that the applicant proposes to apply <u>specifically to the execution of the Contract</u> including: <ul style="list-style-type: none"> - the energetic performances of the Equipment - the proposed insulating gas to be used - the waste management - the REACH - (Regulation (CE) n°1907/2006 of the European Parliament and Council) - compliance - low emission transports, - high Mean Time Between Failures, - high lifetime, - high degree of reparability. 		pdf
.O7	Original bank details of the company, containing all information required for the payment of the services	x	

ONERA Direction des Achats
 29 Avenue de la Division Leclerc – CS 90027
 92322 CHATILLON Cedex

The applicant may complete its offer with any other additional document (or information) deemed useful and relevant.

The documents listed above shall be written either in French or in English.

The period of validity of the offers is **4 months** from the deadline for submission of the offers which will be mentioned in the invitation to submit an offer or from the date of submission of updated and/or final offers, for later versions.

The procedures for sending offers are specified in section 5 below.

4.2 Analysis and evaluation of offers - award

a. Analysis of offers – Variant and PAS with optional costing

The free variants are analyzed in the same way as the basis offer, according to the criteria specified in 4.2.d below.

The PAS with OPTIONAL costing are not taken into account for the analysis of the offers. After analyzing and ranking the offers according to the criteria listed in d. below, ONERA decides whether or not to confirm these PAS.

b. Analysis of offers – Negotiations

The analysis of the offers may be carried out in several successive stages.

In particular, ONERA reserves the possibility of negotiating with a shortlist of candidates, i.e. only with those who have submitted the best offers (following an initial ranking, established in accordance with the selection criteria indicated in d. below, and if the offers are not eliminated for one of the reasons set out in c. above), during as many stages of negotiation as may prove necessary.

This negotiation can be carried out by e-mail (via PLACE) or during hearings by videoconference.

All elements of the contract and offer are negotiable, except for the intellectual property rights and for the legal and regulatory clauses.

Negotiations are conducted on the basis of the principle of equal treatment of candidates.

At the end of the negotiation(s), a final offer is requested from all candidates admitted to negotiate. This final offer may not be negotiated further.

The final offers are scored and ranked according to the same criteria (specified in d. below).

The contract is then awarded to the company that submitted the best offer (having obtained the best overall score).

However, as a reminder, ONERA reserves the right to award the contract on the basis of the initial offers without negotiation.

c. Reasons for elimination of offers

The following are automatically eliminated:

- inappropriate offers as well as offers that remain irregular and/or unacceptable despite possible requests for additional information from ONERA,
- any offer that does not comply with the conditions of presentation set out in section 4.1 of this document, after a possible request for regularization by ONERA.

d. Objective criteria for offer evaluation

To analyze and choose the best offer, ONERA shall rely on the following award criteria with relative weighting given, for a total of 100:

- Criteria 1: Overall total price – 35 point**

The overall total price is the total contract amount (all parts included).

The offer will be analyzed under the following price criteria:

Price criteria		
Firm part	Supply of a 3 MeV proton accelerator and an associated beamline, including the overall analysis of scientific equipment and their building interfaces.	20 pts
Optional part 1	Additional supply of an instrumentation cabinet	5 pts
Optional part 2	Supply of tooling, equipment, and spare parts	5 pts
Optional part 3	On-factory storage of the material	5 pts

The amounts proposed by the applicants shall be set in Appendix No. 2 (O2) to the draft contract.

Separate quotations sent by applicants will therefore not be taken into account.

- Criteria 2: Characteristics of the technical offer - 40 points**

The analysis of the offer under this criterion will be made on the basis of the requirements matrix (O3) duly completed by the applicant.

It should be noted that the applicant must provide evidence to support the information it has entered in the matrix in its technical offer (O4). Information that is deemed to be insufficiently accurate or for which there is insufficient evidence, if any, will be disregarded and will be treated as a non-response.

- Criteria 3: Planning – 15 points**

The analysis of the offer under this criterion will be made on the basis of the detailed planning provided by the applicant (O5).

It should be noted that not only the global leadtime will be evaluated, but also the consistency of the leadtime of the different milestones.

- Criteria 4: Environmental provisions – 10 points**

The analysis of the offer under this criterion will be made on the basis of the environmental provisions provided by the applicant (O6).

5 TENDER (APPLICATION AND OFFER) SUBMISSION REQUIREMENTS

For each step (1: application – 2: offer), the applicant should respect the following provisions.

5.1 Tender submission

The applicant shall submit its tender (application for step 1, offer for step 2) in electronic form.

This file shall be submitted **only** via the <https://www.marches-publics.gouv.fr> website (on ONERA's buyer profile).

In the event of a problem on the PLACE, a support and technical assistance service for the use of this dematerialization platform is available online:

<https://www.marches-publics.gouv.fr/assistance/?token=55226fb7-d16a-4fb3-9f1a-54ef38822106>

Remarks concerning the submission of files on PLACE:

1/ As some maintenance operations are carried out on PLACE on Wednesdays between 7pm and 10pm, the applicant is advised to avoid choosing this period to submit its application.

2/ It is recommended to the applicant to sufficiently anticipate the verification of the configuration of its computer according to the detailed constraints on the PLACE platform and the submission of its offer in order to avoid last minute problems.

3/ The applicant has the possibility of submitting several successive offers in case of an item being forgotten or an error that needs to be rectified. Each file submitted cancels and replaces the file previously submitted by the applicant. As a result, only the last file submitted will be opened by ONERA: it must therefore include all the documents requested in this document (in support of the application and the offer).

5.2 Backup copy

The applicant may also send at the same time a backup copy on digital media (USB stick, CD, etc.), which shall contain the same files or information.

The backup copy may be opened by ONERA and replace the documents sent via the PLACE website only in the following cases:

- if ONERA detects a virus in the electronically transmitted folder;
- if a file has been transmitted by electronic means without reaching ONERA within the expected deadlines;
- if the file by electronic means cannot be opened by ONERA.

The backup copy shall be sent in a sealed envelope, indicating:

CONSULTATION / REF. 2025ALOI-PROTONS_ACCELERATOR-CT

NE PAS OUVRIR

FRANCE

In all cases, in order to be opened, the envelope containing the back-up copy shall arrive before the deadline indicated on the first page.

5.3 Non-disclosure agreement (NDA)

The Non-Disclosure Agreement (NDA) shall be submitted:

- preferably, in PDF format and signed by an authorized person with a signature certificate issued by a qualified trust service provider, meeting the requirements of the eIDAS regulation, using the electronic signature creation tool offered by the PLACE buyer profile (preferably in PAdES format) (see article 6 below);

OR

- in 2 ORIGINAL paper copies signed by an authorized person, that should be delivered to ONERA before the deadline indicated on first page.

The paper copies shall be sent in a sealed envelope, indicating:

CHATILLON Cedex
FRANCE

The NDA shall be received by ONERA before the date and time specified on the cover page.

6 ELECTRONIC SIGNATURE OF DOCUMENTS

ONERA has electronic signature certificates and therefore promotes as much as possible the electronic signature of its contracts.

Thus, ONERA encourages the applicant and potential future Supplier to obtain qualified electronic signature certificates that comply with the eIDAS Regulation (Regulation (EU) n°910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trusted services for electronic transactions within the internal market), for persons with the power to bind the company.

The Supplier will then be able to use the signature tool available on PLACE, to sign contractual documents in the authorized signature formats XAdES, CAdES or PAdES.

The signature will be validated by ONERA if all the controls carried out by the PLACE tool are passed successfully and if the holder of the signature certificate used has the power to commit the company. For information purposes, the controls carried out by the tool available on PLACE are as follows:

1. identity of the signatory;
2. whether the signatory's certificate belongs to one of the categories of certificates mentioned in article 2 of the French Government decree of 22nd March 2019 relating to the electronic signature of public procurement contracts;
3. compliance with the signature format mentioned in Article 3 of the French Government decree of 22nd March 2019;
4. the certificate is not expired and has not been revoked on the date of signature;
5. integrity of the signed document.
