This elevation view shows the side profile of the assembly. It features a central actuator mechanism (22) mounted on a base (15, 15S, 16). The assembly is supported by a long horizontal rail (1B, 2B, 3B) with multiple mounting points. A dimension line indicates a total length of 2178 units. A vertical dimension line on the left indicates a height of 461 units. Section lines A-A and B-B are shown, with B-B indicating a cross-section through the central actuator and the rail assembly.

The diagram shows a cross-sectional view of a mechanical assembly. A vertical plate (labeled 9) is mounted on a wall (indicated by a dashed line). A horizontal plate (labeled 8) is attached to the vertical plate via a bolt (labeled 9). The horizontal plate has a central hole (labeled 4B) and a smaller hole (labeled 5B). A vertical plate (labeled 6B) is attached to the horizontal plate via a bolt (labeled 4B). The vertical plate has a central hole (labeled 14B) and a smaller hole (labeled 15B). A horizontal plate (labeled 16B) is attached to the vertical plate via a bolt (labeled 14B). The horizontal plate has a central hole (labeled 14B) and a smaller hole (labeled 15B).
