PLAN PRINCIPE NICHE VERTICALE

RÉEMPLOI CIMAISES MODULAIRES / BNF

module de 120 assemblé

module de 120 principe d'assemblage

montant horizontal
serrurerie métal
principe d'emboîtement en tubes section carré

montant vertical
serrurerie métal
principe d'emboîtement en tubes section carré

Panneau de façade
En MDF 19mm M1 ou CP (en fonction de la technique de mise en peinture retenue)
Avec tôle pliée pour assurer la pose des panneaux sur les montants horizontaux

Panneau latéral
En MDF 19mm M1 ou CP (en fonction de la technique de mise en peinture retenue)
avec porte d'accès montée sur charnière
Tôle pliée pour assurer la pose des panneaux sur les montants verticaux

Plateau
En CP 18mm avec passage de câbles
permet la pose de lest

Platine mobile
En tube métal soudé avec vérin de réglage de niveau/stabilité et roulettes pour assurer la mobilité

principe de cimaises mobiles et démontables
avec une structure en serrurerie métal montée sur une
platine mobile (sur roulettes avec verin de stabilisation,
réglable de l'intérieur)
le montage ne nécessite pas de vissage et est assuré
uniquement par des emboîtements
ce système permet de remplacer les façades par des
panneaux vitrines, des panneaux écrans...
Les modules peuvent être déplacés ou démontés pour
minimiser l'espace de stockage

MISE EN PEINTURE HORS LOT
