RipEX

RipEX, 1st generation, is a best-in-class compact radio modem. This native IP device with Linux has been designed with attention to detail, performance and quality. It is proven within the market since 2011 and used in thousands of installations.

RipEX2, 2nd generation, was introduced in 2018. This more powerful radio and cellular modem in one provides significant improvements, especially in terms of data speed, security and number of interfaces while all relevant state-of-the-art concepts have been carefully implemented.
