Echelle en Y : 1/100

Béton
Enrochement bétonné

Raccord au TN adapté sur site

PC : 1097.00 m

The diagram illustrates a cross-section profile with vertical axes representing elevation and horizontal axes representing distance. The profile shows a series of peaks and valleys, with specific points labeled P01 through P28. The area under the profile is shaded in red and blue, indicating different materials or structures. A legend identifies the colors: red for concrete (Béton) and blue for reinforced concrete armor (Enrochement bétonné). A note indicates a 'Raccord au TN adapté sur site' (adaptation to ground level) at a specific point.
