

QRCode Specifications

A QRCode MIGHT be printed on each card to link it to the ESCR platform.

QRCode Contents

The content of the QRCode is an URL with the **http** scheme that points to the domain **esc.gg** (or pp.esc.gg for sandbox) completed by the **ESCN** :

Example

- Sandbox : **<http://pp.esc.gg/e6480dc0-9fba-1035-a6bd-001932465463>**
- Production : **<http://esc.gg/e6480dc0-9fba-1035-a6bd-001932465463>**

QRCode recommendations

- The error correction level recommended is **M** (Medium) : 15% of codewords can be restored
- The minimum size recommended on the card is **15mm x 15mm**
- You can use your own programming library to generate the QRCode. If you don't have one, you can consider zxing
